

**ABBY**<sup>™</sup>  
MEANINGFUL  
ENGAGEMENT

# Empowering Engagement, Enhancing Care

Transform everyday moments into meaningful experiences.

ABBY<sup>™</sup> is a multi-modality engagement kiosk for residents living with dementia or cognitive decline. Designed for anytime use, ABBY invites residents to engage in activity they can easily do themselves with their current abilities and interests. ABBY restores **purpose, independence, and joy** — while helping staff deliver **person-centered care** more efficiently.

*“Quality of life is largely defined by the activities available.”*

— Dr. Maria Montessori

ABBY is clinically proven Dementia-Care technology.

### For Operators: Value You Can Measure

#### Reduces Staff Burden

ABBY engages residents independently, calming environments and freeing caregiver time.

#### Improves Outcomes

Communities using ABBY see fewer behavioral incidents, less PRN medication, and better mood and participation.

#### Simple to Implement

Mounts to wall, plug-and-play setup, and minimal training.

#### Proven ROI

Drives efficiency, enhances satisfaction, and supports compliance with person-centered programming standards.

### For Residents: Quality of Life Reimagined

#### Familiar and Comforting

Feels natural — even for those with memory loss or cognitive changes.

#### Restores Independence

Residents choose what they enjoy — when they want.

#### Fosters Connection

Encourages conversation, storytelling, and shared moments.

#### Engages the Whole Person

Stimulates creativity, cognition, and calm through intuitive, sensory activities.

#### Meets Every Ability

Touch, sound, and visuals support engagement at every stage of cognitive change.

### Aligned with Person-Centered & Person-Directed Care

ABBY empowers residents to make their own choices and engage in ways that feel natural — reinforcing your community's commitment to individualized, dignified care.
